

INDUSTRIAL TRAINING PROCESS

Each student must complete industrial training at a pharmaceutical company as a part of their Bachelor of Pharmacy curriculum.

STEP 1

Meet All Prerequisite Conditions

- Ensure that you have completed all courses required for the B. Pharm. degree.
- Ensure that your project work and defense is completed or in the process of completion.
- *You will not be permitted to apply for industrial training if you do not meet the above-mentioned requirements.*

Look for a Placement at Pharmaceutical Companies

- Once you meet all the prerequisites, you should begin searching for companies that offer industrial training.
- Communicate with a company representative and send them your resume.
- Get an email or letter confirming your industrial training at the company.
- *Without written confirmation from the company the university will not issue a forwarding letter.*

STEP 2

STEP 3

Get Permission from the School of Pharmacy

- Meet with the assigned faculty from the 'In-plant Training Committee' with the confirmation letter or email from the pharmaceutical company.
- In three to four working days following verification, the school will issue a forwarding letter to either the student or the company.
- Please note that, providing the letter may take more time depending on various circumstances.

Join Industrial Training

- After receiving the letter of forwarding, submit it to the pharmaceutical company and begin your training as directed by the company.
- On the day of joining, notify the School of Pharmacy authority about your industrial training.

STEP 4
